

# Onboarding for SkySpark®

A data analytics platform by SkyFoundry

## PROJECT BRIEF ▲

**Fantom Factory** wanted to offer a range of **SkySpark** eLearning courses, to be made available directly from their website.

Each course would be designed for **SkySpark** job roles.

These courses all needed to have custom training features for topics specific to **SkySpark** roles, such as programming or analytics.

## CHALLENGES ▲

We needed to create custom question types for more digital interaction, such as for code expressions.

To use set questions and examples for training, all the courses would need to refer to a hosted and fixed data set online.

Access to courses would need to be online and globally generated from **Fantom Factory** website shop sales for instant enrolment.

## SOLUTIONS ▲

Our team set up a cloud-hosted **SkySpark** instance with synthesised training data for direct integration into the eLearning.

We undertook significant market research on the job roles and skill sets required to shape each syllabus for measurable outcomes.

The entry-level course, **SkySpark Analyst** was launched first in August 2020, then **Axon Programmer**, **SkySpark Engineer**, and finally **SkySpark Viewbuilder**.

Each course was fully CPD accredited and has an accompanying journal for long-term access to key training points.

The platform uses digitally generated codes for easy access control.

## OUTCOMES ▲

- Students learn online to their own schedules.
- Onboarding content starts from the very beginning.
- The direct integration enables practical activities with the **SkySpark** product to “learn by doing”.
- Companies around the world rely on these courses for new hire recruitment and new customer onboarding.

## At a glance

Courses: **4 x SkySpark** courses

Topics: **analytics, programming, engineering, dashboarding**

Technology: **hosted SkySpark**

Type: **commercial product**

CPD: **69 accreditation hours**

## Key metrics

 Launched SkySpark Analyst August 2020

 1600+ students certified

 Global accessibility

 Can be used for sales promotion

 CPD accredited courses
